3.G.14.a

The above calendar is an example of how we are currently using Music as a general concept in the classroom to study. We have staff members who have brought in different drums like gynea bay drums to talk about different cultural music. We have read a story called Jazzy Miz Mozzetta and then listened to Jazz music. We have talked about math when we learned about beats and rhythms. We will do gross motor when we learn new dances. We will practice fine motor skills by making new music shakers.

Technology is used regularly throughout the year when the children see teachers using cameras. The children are sometimes allowed to use the camera to take pictures from their own point of view. Sometimes children are exposed to technology when cooking and a blender may need to be used by a teacher.
